

Nomad Tech is concerned with the **protection of the environment**, considering pollution prevention as one of the fundamental pillars of its strategy. Nomad Tech's Management is committed to **minimizing the environmental impact of its activities, products and services**.

To achieve this goal, it has established the following environmental management principles:

1. **Compliance with environmental legislation** and other applicable requirements.
2. **Awareness and training of employees** on environmental issues.
3. Launch of innovative projects, focused on **customer's operational efficiency increase criteria** and **obsolescence management of existing assets**.
4. **Continual improvement of its environmental performance**, by means of:
 - . Efficient use of energy;
 - . Reduction of the risk of production waste;
 - . Progressive adoption of more "environmentally friendly" materials;
 - . Integration of components into final products that comply with applicable regulations and directives on hazardous substances.

Environmental management at Nomad Tech is framed by **Standard ISO14001**, fulfilling its **compliance obligations** and promoting the **continual improvement** of the Environmental Management System (EMS) in order to pursue an eco-friendly performance.
